

ADAS Environmental Policy

Our commitment to Business and the Environment

ADAS recognises that it has an environmental responsibility in all activities to ensure that sustainability and the environment are taken into consideration as it operates its business. The following commitments are made everywhere that ADAS operates:

Objectives:

- Implement a Corporate Social Responsibility (CSR) strategy that commits to achieving a sustainable balance between the current and future needs of our business and those of society and the natural environment.
- Implement this environmental policy and continually work to improve our environmental performance in a manner consistent with the ISO 14001 environmental management system standard.
- Set objectives and targets to continually improve our environmental credentials, to monitor and evaluate against key performance indicators and report to stakeholders.

Environmental Impacts:

- Demonstrate the positive environmental effects that may arise through our business operations.
- Minimise the negative environmental impacts that may arise through our business operations.
- Take all reasonable steps to prevent pollution of the environment (including having effective plans in place to manage environmental incidents and emergencies at office locations).
- Reduce our environmental footprint by reducing carbon emissions and energy waste.
- Endeavour to achieve efficient and sustainable use of utilities.
- Give due consideration to the environmental effects of office practices and business travel when making purchase decisions and arranging meetings/deploying staff.
- Make good use of organic materials, whenever possible extracting beneficial value.
- Explore and utilise opportunities to recycle consumables.
- Manage business wastes to maximise amounts sent for recycling and recovery and minimise amounts sent for landfill.

Compliance:

- Comply with all applicable environmental legislation, Codes of Practice and other requirements relevant to our environmental aspects.
- Anticipate and respond to the demand of future environmental legislation.
- Ensure that sub-contractors and service suppliers are fully aware of our environmental policy and the environmental responsibilities placed upon them when working for ADAS.

Responsibilities:

We will work with all our employees in order to achieve the points set out above and provide the necessary training and resources to ensure that our commitments are met. We will also require ADAS sub-contractors and suppliers to follow environmental good practice, and encourage our clients to do so.

ADAS is fully committed to the implementation of the Policy, for which I take overall responsibility. The policy will be periodically reviewed so that it continues to be appropriate to the environmental impacts of the Company's activities and services.

Ian Strudwick
Managing Director
RSK ADAS Limited
