An assessment, economic valuation and spatial mapping of a range of Ecosystem Services in Sherwood

**Aim:** To form a baseline against which to measure the impacts of the ‘Miner2Major’ Landscape Partnership Scheme (LPS). This project will inform and support the Landscape Conservation Action Plan, a required supporting document for Stage 2 submission to the Heritage Lottery Fund.

**Methodology**
- Stakeholder workshop to gain consensus on key Ecosystem Services (ES) in Sherwood area
- Economic valuation of these services
- Mapping of service capacity and demand using EcoServ GIS

**Outcomes and impact**
- Baseline quantification of ES & opportunities for payment
- Identification of opportunities for strategic development
- Advice on best means of engagement with community
- Advice on how ES can be incorporated into an Monitoring & Evaluation framework

**Contact:** The ADAS Data management, data analysis and GIS team
